Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2) Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 contains the trademark/trade name Xenoy. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a product and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 103

- 3) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4) Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goupy et al (4029350) in view of Carroll et al (6247745).

Goupy et al provides an impact adsorption device of the type comprising a honeycomb; where the honeycomb features a number of ribs that define respective outlets having a hexagonal section, terminating in holes in a lower part of the honeycomb; the honeycomb being injection-molded in a plastic material, wherein the device is combined with a deformation containment element (4) positioned around a longitudinal end of the honeycomb; the honeycomb has a taper (figure 9) at one of the ends and a deformation containment element, made of high resistance material, wrapped around the tapered end. The examiner takes official notice that the containment element must be made from a high resistance material in order for the impact device to operate correctly. The containment element of Goupy can be attached or be part of a vehicle. Goupy et al lacks the specific teaching of polypropylene or polycarbonate as a material used in an impact adsorption device.

Carroll et al teaches the use of polypropylene and polycarbonate as a material used in an impact adsorption device.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the impact adsorption device of Goupy with the material as taught by Carroll et al merely because the material as taught by Carroll et al is a alternate equivalent to that taught by Goupy.

Response to Arguments

5) Applicant's arguments filed March 31, 2003 have been fully considered but they are not persuasive.

Applicant argues that Goupy et al do not provide a containment element. The examiner believes that element 4 of Goupy acts as a containment element as claimed in the instant application. Please note that applicant does not claim any of the functionality of the containment element which is argued by applicant.

Conclusion

6) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
